Enneagram type and typing is simple and complex simultaneously. The single most challenging aspect of teaching the Enneagram is to assist others in discovering their Enneagram type in an accurate and respectful way. Consider these questions!

Do you know the nuances of type and typing without stereotyping or slotting people into 'type-boxes?'

Do you know how to accurately infer another person's type from what you are hearing, seeing and sensing?

Do you know how to utilize yourself as an asset in typing without your being subjective or projective?

Do you know how to use your head, heart and somatic center in helping others accurately find their type?

Do you know how to factor in life circumstance and factors of diversity – without bias – as you guide another?

Do you know how to act as a guide rather than an expert, even when you possess expertise?

WHAT IS THE ENNEAGRAM?

3 Centers of Intelligence

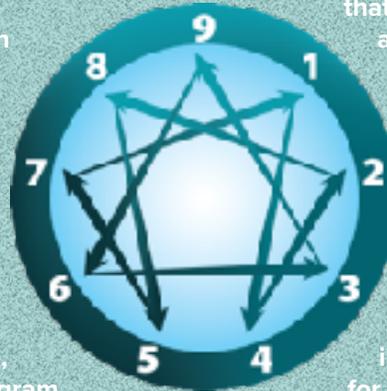

Each Enneagram type is rooted in one of three Centers of Intelligence: the Head Center, the Heart Center, or the Body Center. The three Centers of Intelligence stem from a long Eastern philosophical tradition and refer to the ways in which we typically process information and respond to events. While we all have heads, hearts, and bodies, our personality is organized around one of these three centers or modalities. Each center also contains three of the nine Enneagram types.

Head Center Types: 5, 6, and 7
Heart Center Types: 2, 3, and 4
Body Center Types: 8, 9, and 1

The goal of the Enneagram is integration: to fully and effectively access all three Centers and to use them in an aligned way.

HISTORY

The Enneagram is an ancient system – at least 2000 - 4000 years old. The word comes from two Greek words ennea (“nine”) and gram (“something written or drawn”), and refers to the nine points on the Enneagram symbol. The nine different Enneagram types, identified as numbers One through Nine, reflect distinct habits of thinking, feeling, and behaving, with each type connected to a unique path of development. Each person has only one core Enneagram type, and while our Enneagram type remains the same throughout our lifetime, the characteristics of our type may either soften or become more pronounced as we grow and develop. In addition to our core Enneagram type, there are four other types that provide additional qualities to our personalities; these are called wings and arrows.

CURRENT USAGE

More than a personality typology, the Enneagram is a profound map illuminating the nine different architectures of the human character. It is also the most powerful and practical system available for increasing emotional intelligence, with insights that can be used for personal and professional development.

Because the Enneagram is cross-cultural and uncannily accurate, it’s modern usage is growing dramatically across the globe. In addition to being used by individuals who embrace it for their own insight and development, organizations are using the Enneagram to increase emotional intelligence (EQ), enhance communication, manage conflict constructively, build high-performing teams, develop leadership, and more.

“We are looking for the key to our ultimate fulfillment in the wrong place.” – C. Naranjo
