ADVANCED COACHING WITH THE ENNEAGRAM 2.0

41 ICF ACSTH | Take your Enneagram coaching to a deeper and higher level
4 five-hour sessions plus pre-and post-work with Ginger Lapid-Bogda, PhD

The *Advanced Coaching with the Enneagram* certificate program is designed to enable those who coach others to coach the whole person in context. Based on the assumption that you are already familiar with core coaching theory and practice and know the Enneagram well and can already integrate it into your coaching, this program is based on the Coaching Circle. The Coaching Circle is used in two ways. The overarching use of the Coaching Circle is for coaches to continuously employ the four core modes of coaching behavior: Listening, Questioning, Feedback, and Challenging.

These four areas are utilized throughout the program, focusing first on the client as a whole person with integrated systems of thought patterns, feeling responses, and behavioral habits. Coaching Circles are used as a foundation for group (team) coaching. Coaches pursue an in-depth understanding of the mental maps of clients by enneatype and learn how to illuminate and challenge these mental models in service of the client's growth.

The program also helps coaches focus on how to coach clients to increase emotional literacy, creating awareness, openness, and expansiveness in clients of the nine enneatypes in order to strengthen and enrich their development. Crucially important in coaching is how the body restrains us in ways that limit our ability to grow. The program provides coaches with the opportunity to learn how to work somatically with clients of each type and how to create dramatic release and change. In addition to integrating the mental, emotional, and somatic aspects of coaching, coaches also work with client enneatype-based transformations. Throughout the program, coaches engage in a variety of coaching practices with feedback from both clients and observers.

Open only to past participants of "Coaching with the Enneagram 1.0" or others with in-depth Enneagram-coaching knowledge and skills.

WHAT IS THE PROGRAM STRUCTURE?

Overall Program Orientation

“Advanced Coaching with the Enneagram 2.0” is designed to take the knowledge and skills of coaches – ones who already know the Enneagram well, are experienced coaches, and already integrate the Enneagram with their coaching – to deeper levels with their clients. This program’s purpose is to help coaches coach to the whole person, with particular emphasis on four areas: (1) challenging the client’s mental models and assumptions so that clients have less unconscious resistance to change and expanded options; (2) assisting clients in accessing and more fully utilizing their emotional centers; (3) understanding the importance of somatics in coaching and developing coaching skills to increase somatic capability in their clients; and (4) learning skills to help clients integrate their heads, hearts, and bodies for deep-level growth and transformation. In addition, the program includes a group coaching component, taking your skills from individual coaching to the group coaching level.

Coach Self-Development

There is a strong component of coach development in this program for three reasons. The first reason is that when participants practice what they are learning in the program, they practice with other participants as clients. Second and equally as important, the coach’s own self development is a critical factor in their ability to coach effectively. A coach who is not actively working on his or her own growth will be hampered in fostering the growth of clients. Finally, coaches need to experience the impact of the various coaching techniques and approaches so they understand firsthand the impact of everything they do. This enables coaches to know when, where and how often to use each technique.

Head, Heart and Body Coaching

Each session has a particular focus, going in-depth first into head-center coaching, next heart-centered coaching, and then somatic or body-based coaching. Finally, all three areas are integrated into transformative coaching.

The first session, each participant selects one and only one coaching intention for the entire five days. Each day, almost every coaching interaction delves deeper into this one important deep coaching desire. Working with one coaching intention rather than many allows all participants to experience the impact of using the head, heart and body for the most goals and long lasting transformation.

Intensive

“Advanced Coaching with the Enneagram 2.0” is intended to be intense and intensive. In four deep sessions, plus pre-work and post-work, participants absorb and integrate what they are learning about coaching, the Enneagram and, just as important, themselves.

WHAT IS THE ENNEAGRAM?

3 Centers of Intelligence

Each Enneagram style is rooted in one of three Centers of Intelligence: the Head Center, the Heart Center, or the Body Center. The three Centers of Intelligence stem from a long Eastern philosophical tradition and refer to the ways in which we typically process information and respond to events. While we all have heads, hearts, and bodies, our personality is organized around one of these three centers or modalities. Each center also contains three of the nine Enneagram styles.

Head Center Styles: 5, 6, and 7
Heart Center Styles: 2, 3, and 4
Body Center Styles: 8, 9, and 1

The goal of the Enneagram is integration: to fully and effectively access all three Centers and to use them in an aligned way.

History

The Enneagram is an ancient system – at least 2000 - 4000 years old. The word comes from two Greek words ennea (“nine”) and gram (“something written or drawn”), and refers to the nine points on the Enneagram symbol. The nine different Enneagram styles, identified as numbers One through Nine, reflect distinct habits of thinking, feeling, and behaving, with each style connected to a unique path of development. Each person has only one core Enneagram style, and while our Enneagram style remains the same throughout our lifetime, the characteristics of our style may either soften or become more pronounced as we grow and develop. In addition to our core Enneagram style, there are four other styles that provide additional qualities to our personalities; these are called wings and arrows.

Current Usage

More than a personality typology, the Enneagram is a profound map illuminating the nine different architectures of the human character. It is also the most powerful and practical system available for increasing emotional intelligence, with insights that can be used for personal and professional development.

Because the Enneagram is cross-cultural and uncannily accurate, it's modern usage is growing dramatically across the globe. In addition to being used by individuals who embrace it for their own insight and development, organizations are using the Enneagram to increase emotional intelligence (EQ), enhance communication, manage conflict constructively, build high-performing teams, develop leadership, and more.

"We are looking for the key to our ultimate fulfillment in the wrong place." – C. Naranjo
